EDUCATION

Bachelor of Science, Computer Science

April 2025

Brigham Young University

Provo, UT

- GPA: 3.7
- Emphasis: Software Engineering
- Extracurricular Activities: Men's Rugby Team, Developers Club, Competitive Programming Club

EXPERIENCE

Back End Software Engineer

September 2024 – Present

BYU Law School

Provo, UT

- Created unit tests for previously untested database functionalities to enhance reliability and coverage
- Refactored an internal fake data generator leading to reduced complexity, improved runtime efficiency, and a more streamlined architecture
- Identified multiple bugs during testing, contributing to the establishment of a new testing standard

Software Engineering Intern

May 2024 – August 2024

309th Software Engineering Group; Hill AFB

Ogden, UT

- Consolidated 3 information tracking platforms into a centralized personnel management dashboard built using React, JavaScript, and Electron that was deployed on a secure government network
- Proactively enhanced team productivity by meticulously documenting stakeholder feedback and adding detailed story cards to the scrum board, leading to the most productive month for the team
- Granted active Secret security clearance by the United States Department of Defense

Scrum Master

April 2021 – September 2021

Brigham Young University Office of Information Technology

Provo, UT

- Ensured Agile development practices were implemented across the authentication and Business Intelligence teams
- Facilitated Agile Scrum ceremonies including Daily Standup, Sprint Planning, and Sprint Retrospective
- Led the team's backlog grooming efforts resulting in meaningful detail on 100% of story cards

SKILLS

- Languages: Java, C++, C, Python, JavaScript/TypeScript, Bash, and HTML/CSS
- Frameworks & Platforms: React, Next.js, React Native, Expo, and Electron
- Database Technologies: SQL, MongoDB, DynamoDB, MySQL, PostgreSQL, SQLite, and Redis
- DevOps & Tools: GitHub, GitLab, CI/CD Pipelines, Docker, Jest, and Playwright
- Strong understanding of Agile methodologies and Scrum ceremonies
- Experienced in technical writing and producing code documentation
- Fluent in the Fijian language

RELEVANT PROJECTS

Capstone Project, CS 480

January 2025 – Present

- Worked in a team to develop a cross-platform job and employee tracking application for plumbers by utilizing React Native, Typescript, and PostgreSQL
- Directed discussions with stakeholders and the product owner to create and maintain a well-groomed product backlog

Class Project, CS 452

February 2024 – March 2024

- Interfaced with the OpenAI GPT-3 API to create a program that converted natural language questions into working SQL queries, leveraging best practices in from current research on large language models
